PEER REVIEW PUBLICATIONS (Listed in Chronological Order):

Williams DO, Most AS: Clinical, angiographic and hemodynamic characteristics of patients with a strongly positive exercise test. Cardiology 1980;66:247-249

Gewirtz H, Ohley W, Williams DO, Sun Y, Most AS: Effect of intraaortic balloon counterpulsation on regional myocardial blood flow and oxygen consumption in the presence

Williams DO, Ruocco NA, Forman S and TIMI Investigators: Coronary angioplasty following recombinant tissue-type plasminogen activator in acute myocardial infarction: A report from the Thrombolysis in Myocardial Infarction Trial. Journal of the American College of Cardiology 1987;10(5):45B-50B.

Passamani E and TIMI Investigators: The (TIMI) Thrombolysis in Myocardial Infarction Phase II Pilot: Tissue plasminogen activator (rt-PA) followed by percutaneous transluminal coronary angioplasty (PTCA). Journal of the American College of Cardiology 1987;10(5):51B-64B.

The TIMI Study Group. Comparison of invasive and conservative strategies after treatment with intravenous tissue plasminogen activator in acute myocardial infarction. Results of the

Williams DO, Topol EJ, Califf RM, Roberts R, Mancini GJB, Joelson JM, Ellis SG, Kleiman, NS and Co-Investigators: Intravenous recombinant tissue-type plasminogen

The TIMI IIIA Investigators: Early effects of tissue-type plasminogen activator added to conventional therapy on the culprit lesion in patients presenting with ischemic cardiac pain at rest. Results of the Thrombolysis in Myocardial Ischemia (TIMI IIIA) Trial. Circulation 1993;87:38-52.

Zaret BL, Wackers FJ, Terrin ML, Forman SA, Williams DO, Knatterud GL, Braunwald E: Value of radionuclide rest and exercise left ventricular ejection fraction to assess survival of
patients following thrombolytic therapy for acute myocardial infarction: Results of the Thrombolysis in Myocardial Infarction (TIMI) Phase II Study. Journal of the American College of Cardiology 1995;26:73-79.

Chaitman BR, Rosen AD, Williams DO, Bourassa MG, Aguirre FV, Pitt B, Rautaharju PM, Rogers WJ, Sharaf BL, Attubato M, Hardison RM, Srinivas VS, Kouchoukos NT, Stocke K,

Keelan PC, Johnston JM, Koru-Sengul T, Detre KM, Williams DO, Slater J, Block PC, Holmes, Jr. DR, for the Dynamic Registry: Comparison of in-hospital and one-year outcomes in patients with left ventricular ejection fractions ≤ 40%, 41% to 49%, and ≥ 50% having percutaneous coronary revascularization. American Journal of Cardiology 2003;91:1168-1172.

INVITED PUBLICATIONS, BOOK CHAPTERS, MONOGRAPHS
(Listed in Chronological Order):

Abbott JD and Williams DO: Guidewire Manipulation (in press textbook chapter: The Interventional Cardiologist)
ABSTRACTS (Listed in Chronological Order):

Vera Z, Awan N, Williams DO, Miller RR, Mason DT: Multiple etiologies and electrocardiographic types of right axis deviation with right bundle branch block. Relation to befascicular block with left posterior hemiblock. Clinical Research 1975;23:86A.

Amsterdam EA, DeMaria AN, Williams DO, Markson W, Vismara LV, Mason DT: Effects of nitroglycerin of left ventricular hemodynamic and regional contractile function. Clinical Research 1975;23:170A.

Williams DO, Hilliard GK, Cantor SA, Miller RR, Mason DT: Comparison of nitroprusside and phentolamine in left ventricular impedance reduction therapy of cardiac failure. Clinical Research 1975;23:88A.

Williams DO, Most AS: Coronary responsiveness to vasoconstrictor agents in the conscious pig. Clinical Research 1978;26:608A.

Williams DO, Riley RS, Drew TM, Most AS: Effect of sublingual nitroglycerin on regional coronary blood flow in the relief of pacing induced angina. Circulation 1979;60:82.

Williams DO, Most AS: Contrasting effects of bolus versus sustained administration of intracoronary nitroglycerin on myocardial blood flow. Clinical Research 1980;28:221A.

Williams DO for the TIMI Investigators: Intravenous recombinant tissue type plasminogen activator (rt-PA) in acute myocardial infarction: a report from the NHLBI Thrombolysis in Myocardial Infarction (TIMI) Trial. Journal of the American College of Cardiology 1985;5:495.

Williams DO, Ruocco NA, Forman SA and the TIMI Investigators: Coronary angioplasty after recombinant tissue-type plasminogen activator in acute myocardial infarction: a report from the Thrombolysis in Myocardial Infarction (TIMI) Trial. Journal of the American College of Cardiology 1987;10:45B-50B.

Sharaf BL, Riley RS, Drew TM, Most AS, Williams DO: Durability of coronary angioplasty: clinical and angiographic outcome at 5 to 8 years following successful dilatation. Journal of the American College of Cardiology 1988;11:60A.

Sharaf B and Williams DO: Predictors of recurrent restenosis following successful repeat-PTCA. Clinical Research 1989;37(3).

Sharaf B and Williams DO: Predictors of recurrent restenosis following successful repeat-PTCA. Circulation 1989;80(Suppl II):64.

Williams DO, Holubkov A, Detre KM, Holmes DR, Kent KM, King SB and NHLBI PTCA Registry Investigators: Late outcome of patients treated with PTCA for acute myocardial infarction: A report from the NHLBI PTCA Registry. Journal of the American College of Cardiology 1991;17(2):99A.

Holmes DR, Detre KM, Williams DO, Kent KM, King SB, Yeh W, Steenkiste A: Long-term outcome of patients with depressed left ventricular function undergoing percutaneous transluminal coronary angioplasty-the NHLBI PTCA Registry. Journal of the American College of Cardiology 1991;17(2):100A.

Gray WA, Bier JD, Emin SA, Williams DO: Angioplasty balloon materials are a
determinant of the dilating force generated at the site of a severe stenosis. Circulation

Levine DJ, Sharaf BL, Williams DO: Late follow-up of patients with totally occluded
saphenous vein bypass grafts treated by prolonged selective urokinase infusion. Journal of
the American College of Cardiology 1992;19:(3):292A.

Sharaf BL, Williams DO, McMahon RP, Barry J, Bjerregaard P, Davies RF, Goldberg AD,
Parks M, Pepine CJ, Sopko G and Conti CR for the ACIP Investigators: Is there a high
prevalence of complex plaque in patients with asymptomatic cardiac ischemia? Qualitative
and quantitative description of coronary anatomy in patients in the ACIP study. Journal of
the American College of Cardiology 1993;21(2) 46A.

Cannon CP, McCabe CH, Henry TD, Rogers WJ, Schweiger M, Gibson RS, Anderson JL,
Williams DO, Braunwald E for the TIMI 5 Investigators: Hirudin reduces reocclusion
compared to heparin following thrombolysis in acute myocardial infarction: results of the
TIMI 5 trial. Journal of the American College of Cardiology 1993;21(2) 136A.

McKendall GR, Berman MS, Sharaf BL, Lee B, Williams DO: Comparison of the
effectiveness of intravenous heparin, intravenous rt-PA, and intracoronary urokinase for
treatment of intracoronary thrombus. Journal of the American College of Cardiology
1993;21(2) 137A.

SA, Knatterud GL and Braunwald E for the TIMI Investigators: Two- and three-year results
of the Thrombolysis in Myocardial Infarction (TIMI) Phase II Clinical Trial. Journal of the
American College of Cardiology 1993;21(2) 176A.

Sharaf BL, Miele N, Ferreira P, McKendall GR and Williams DO: Culprit lesion changes in
acute myocardial infarction: A TIMI 5 comparison of patients treated with t-PA and either
heparin or hirudin. Journal of the American College of Cardiology 1993;21(2) 419A.

McKendall GR, Forman S, Sopko G, Braunwald E, Williams DO and the TIMI Investigators:
The value of rescue PTCA following unsuccessful thrombolytic therapy: A report from
TIMI. Journal of the American College of Cardiology 1993;21(2) 396A.

Kent KM, Williams DO, Cassagneau B, Broderick T, Chapekis A, Simpfendorfer C, Cote G.
Bates E, Tauscher G, Kuntz RE, Popma JJ, Foegh M: Double blind, controlled trial of the
effect of angiopeptin on coronary restenosis following balloon angioplasty. Circulation

Cinderella JA, Williams DO, Wanlin Y, Faxon DP, Kelsey SF, Detre KM and NHLBI PTCA
Investigators: Coronary angioplasty should be repeated at least twice for restenosis.

Stone PH, Sharaf BL, Andrews TC, McMahon RP, Pepine CJ, Williams DO, Bourassa MG, Sopko G, Conti CR: Relationship between angiographic severity of coronary disease and left ventricular dysfunction and frequency of ambulatory ischemia in the asymptomatic cardiac ischemia pilot (ACIP) study: Journal of the American College of Cardiology 1994:1A:133A.

Cannan CR, Williams DO, Cohen HA, Yeh W, Kelsey SF, Deter KM: Target lesion revascularization following coronary angioplasty: a report from the NHLBI PTCA Registry. Journal of the American College of Cardiology 1997;29(2) Supplement A:382A.

Williams DO, Vlachos H, Deter KM, Cohen H, Jacobs AK, Kelsey SF: Patients who are not treated with stents in the stent era: Who are they and what is their outcome? Journal of the American College of Cardiology 2001:37(2) Supplement A:53A.

fibrillation – current results of the first US-European multicenter trial. The American Journal of Cardiology 2005;96(Suppl 7A) 89H.
